FRONT END DEVELOPER

Professional Summary

Freelance | Dantech Corporation Inc. | ViaSolutions LLC

Web Developer and Cloud Engineer

JANUARY 2016 - PRESENT

- 5 years of Development experience, as a Front End Developer as well as an AWS Cloud Engineer.

- Construct, design, manage and maintain the CI/CD of responsive, mobile and user friendly websites for small businesses using a variety of tools.
  - Maximizing target engagement and retention by focusing on the User Interface/ User experience.
  - Worked using pure HTML5 and CSS3. Also using frameworks such as Bootstrap
  - Using Text Editors such as Visual Studio code or Sublime Text
  - Supported the code builds by integrating with a continuous integration tool (Jenkins).

- Created web based applications using front end frameworks such as React-Bootstrap and Vue.js as well as Material Design.

- Client-side scripting using jQuery

- Conducted peer code reviews to verify its validity, structure and compatibility with different operating systems, browsers and devices.

- Theme development/Creating user interfaces for enterprise level web applications using Drupal and Wordpress

- Back-end knowledge of Microsoft SQL Server / T-SQL.

- Using SASS and LESS to create custom pattern libraries and web components.

- The testing, merging, and committing of code using Git version control/ Github.

- Develop, implement and recommend technical factors (i.e. bandwidth, browser types, server load, etc), performance improvements and procedures for ongoing website revisions.

- Deliver direct, detailed descriptions and prototypes for site specifications and design plans. Created the automated build and deployment process for application, re-engineering setup for better user experience, and leading up to building a continuous integration system

- Interface with network personnel or hosting agencies regarding hardware or software matters affecting sites.

TECHNICAL SKILLS
